

At Emergency One we are keeping all of our facilities safe and sanitary by following all guidelines from the CDC and local health departments with:

- Reinforced disinfecting processes across all rooms, tables, chairs, computers, door handles and surfaces with EPA-registered cleaning products.
- Monitoring our flow through Clockwise to allow us to adhere to social distancing practices and effectively manage waiting room capacities.
- Providing personal protective equipment (PPE) for our staff as well as patients in need. All symptomatic patients will be provided with a face mask.
- Expanded telehealth services from Eone Telemed to ensure our providers are available for those who need or prefer to receive care from home. You can access this service at www.eoneurgentcare.com.
